## WHY THE BEST AIRPORTS ALL OVER THE WORLD INSTALL OUR PRODUCTS COMPARE yourself

When operating there is full visibility in all directions.

Passengers transit is visible both during day and night.

### OUR PRODUCTS

Traditional models show rusty areas and damages that make them not to be perfectly transparent.

### TRADITIONAL PRODUCTS

On top of that we also offer you:

**TIGHTNESS TO WIND AND RAIN**, due to magnificent adjustment of polycarbonate sights with aluminium profiles that avoid drips inside.

**SUPERIOR QUALITY**. We only use modern materials with high quality: polycarbonate with treatment "hard coat", nylon casted POM Hostaform with high resistance to kerosene and to friction, and high strength aluminium available in any requested finish (doesn't rust or degrade as steel).

**HIGH SECURITY** when operating, due to excellent circular visibility that allow to decrease requested times. Its minimum maintenance makes the product have a low effective cost through the years.
